DATA SHEET - EXCAVATOR POURING BUCKET

Concrete buckets

Excavator pouring bucket

Pouring bucket for concrete for excavator from 13 to 22 tons

Excavator bucket designed for transporting concrete or gravel to hard-to-reach areas on construction sites. The bucket can be supplied with 65 mm or 80 mm pins for easy connection to a quick coupler for excavators from 13 to 22 tons. Concrete can be discharged directly into the bucket from the concrete mixer and then poured into the desired area. It is particularly advantageous for small construction sites and road works, where a construction crane is not used. Built according to strict safety standards, including UNI EN ISO 12100, UNI EN 349, UNI ISO 8686, UNI EN 10027, and UNI EN 10204, all our buckets undergo rigorous quality checks to ensure reliable and long-lasting performance. Each product comes with a metal ID plate, certificate of conformity, and user manual, ensuring maximum safety and ease of use. Furthermore, in compliance with the European Directive, all our products are covered by a one-year warranty, offering our customers peace of mind and confidence in their investment.
