Forklift extensions

Steel extensions for forklift forks

Boscaro fork extensions are designed to increase the versatility of forklifts, allowing for the safe and efficient handling of loads with greater length and depth, including non-standard pallets and double europallets. The closed structure ensures stability and safety during lifting operations, making them ideal for a wide range of industrial and commercial applications.

Main Features:

- **Capacity:** up to 5,000 kg
- **Material:** robust steel with powder coating
- **Compatibility:** suitable for forklift forks with maximum dimensions of 130 mm x 50 mm (depth x height)
- **Entry pocket dimensions:** 135 mm x 55 mm (depth x height) for quick and easy installation
- **Fork requirements:** the minimum fork length must be at least 60% of the extension length. Additionally, the extension must rest at least 60% on the forklift forks.
- **Type:** closed version for maximum safety and stability during operations

Additional Information:

- The fork extension shifts the forklift's load center. For more detailed information, consult the heavy load diagram and the forklift's load center.
- Before purchasing, ensure the extension is compatible with your forklift.
- **Customized capacities and dimensions:** tailor-made capacities and dimensions are available on request. Do not hesitate to contact us for customized solutions.

Choosing Boscaro fork extensions means relying on high-quality solutions designed to enhance efficiency and safety in any working environment.
