Drum lifting clamps

Drum handling clamps

Our diverse range of clamps offers a comprehensive solution for lifting and handling drums, enabling vertical, horizontal, and rotational operations. In particular, the PZF-G model stands out for its swiveling jaws that allow for lifting and rotating the drum by 90 degrees, simplifying handling and emptying operations practically, safely, and efficiently. Our drum lifting clamps are accompanied by a complete user and maintenance manual, providing essential instructions to ensure correct usage and maintenance of the clamp. Additionally, each clamp is equipped with a metal label containing all essential model-related data. This label serves as a practical reference for the user, facilitating quick identification and proper use of the clamp. All our clamps are built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards and are issued with the appropriate label, conformity certificate, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
