Pallet lifting bars

Lifting beams for pallets

A pair of lifting beams specifically designed for lifting pallets, with a load capacity of 2000 kg per pair. Swiveling grip hooks are included to facilitate safe and efficient pallet insertion and lifting. These beams are used in conjunction with 4-arm lifting chains, which attach directly to the ends. This accessory proves particularly useful in confined spaces or with lifting equipment of limited capacity, offering a practical and reliable solution for palletized material lifting operations.
