DATA SHEET - SELF DISCHARGING BOAT SKIP

Self dumping bins

Self discharging boat skip

Self discharging bucket for aggregates and debris for crane

This model of automatic discharge bucket is very simple and safe to use. You just need to rotate the lifting arm backwards and then pull it upwards. This allows you to easily tilt the bucket for material discharge. In the case of this automatic discharge bucket, the entire discharge process takes place without requiring any manual intervention from an operator. Another distinctive aspect of this bucket is that all the sides are lowered and at the same height. This uniformity in the arrangement of the walls greatly facilitates the loading and unloading of materials of different sizes and also helps ensure safe and stable lifting. All our buckets are built and tested according to the standards UNI EN ISO 12100, UNI EN 13854, ISO 8686, UNI EN 10027, and UNI EN 10204 and come with the appropriate metal ID plate, certificate of conformity, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
