## DATA SHEET - LAYDOWN CONCRETE SKIP WITH SIDE DISCHARGE AND LEVERED OPENING

Concrete buckets

### Laydown concrete skip with side discharge and levered opening

#### Laydown concrete bucket with side discharge and lever opening

The laydown concrete bucket is specially designed to facilitate ground loading via the concrete mixer, thanks to its reduced edge height. This model, with its distinctive and innovative construction, features a side discharge once lifted and positioned vertically by the crane, making it ready for use. The valve is equipped with a guillotine closure operated by two side levers, ensuring precise control over the concrete pour. All our buckets are built and tested in compliance with stringent standards UNI EN ISO 12100, UNI EN 13854, ISO 8686, UNI EN 10027, and UNI EN 10204. Each product comes with a metal ID plate, a certificate of conformity, and an operation and maintenance manual to ensure correct long-term use. Furthermore, all our products are covered by a one-year warranty in accordance with European Directive, and are made with certified materials to ensure durability and safety, meeting the required quality standards in the construction sector.
