DATA SHEET - GALVANIZED KERB LAYING CLAMP

Lifting clamps

Galvanized kerb laying clamp

Galvanized kerb laying clamp with side handles

The PZC-L ZN model is a clamp suitable for transporting concrete slabs and curbs. An angled support on one side, which rests against the already laid curb, allows for close positioning, while the grip at the curb's head enables use in very tight spaces. It can be used manually using the side handles and with a crane or excavator using the centrally positioned lifting eye. The process of hot-dip galvanizing provides effective corrosion protection, ensuring strength and durability for our product. All our clamps are built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards and come with the appropriate label, certificate of conformity, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
