DATA SHEET - CLAMP FOR MANHOLE COVERS AND CONCRETE SLABS

Lifting clamps

Clamp for manhole covers and concrete slabs

Mechanical clamp for concrete slabs

This mechanical clamp is a lifting accessory designed for exclusive use with suitable lifting equipment or machinery. It has been developed to meet the need for a device capable of ensuring a secure and easy grip on manhole covers or square and rectangular slabs, allowing for easy lifting and positioning during installation phases. The clamping force is generated by the weight of the lifted object itself, while the release occurs when the load is placed on the ground. All our clamps are built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards and come with the appropriate label, certificate of conformity, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
