DATA SHEET - FORK MOUNTED CRANE JIB

Warehousing logistics

Fork mounted crane jib

Fork mounted telescopic crane jib

The Boscaro telescopic crane jib for forklift is the ideal solution to expand the versatility of your forklift and turn it into an efficient mobile crane. Designed for safe and precise lifting operations, this attachment allows you to handle loads up to 4500 kg.

Perfect for industrial environments, construction sites, and logistics warehouses, the crane jib enables you to reach high or distant points, improving productivity without the need to invest in additional machinery.

Main features:

- Durable steel structure for maximum strength and long-lasting performance.
- Telescopic extension from 700 mm to 3,530 mm, adaptable to every lifting requirement.
- 360° swivel hook and locking pin to safely secure the desired length.
- Quick installation: easily mounts on forklift forks without structural modifications.
- Universal compatibility with most industrial forklift models.

The telescopic crane jib is an efficient solution to increase the versatility and performance of your forklift in any operational context. In just a few minutes, it can transform the forklift into a full-fledged crane, expanding handling possibilities and reducing the need for additional machinery. Using this attachment helps contain operating costs, optimize investments, and make the most of existing equipment.

Its solid structure and integrated safety systems guarantee stability and reliability even when lifting heavy loads, providing maximum protection for both the operator and the handled materials. The Boscaro telescopic jib is therefore an indispensable accessory for anyone looking to enhance their forklift's functionality with a safe, practical, and durable solution.
