CMR-12SPZN	1000	62	1200	800	650	150	80

DATA SHEET - GALVANIZED STACKING MESH STEEL STILLAGE

Storage and handling equipment

Galvanized stacking mesh steel stillage

Galvanized stackable mesh frames of various sizes

The series of CMR mesh frames represents the ideal solution, with a load capacity of 1000 kg, for the storage and transportation of small-sized goods or waste. This series has been designed with an emphasis on safety and practicality, making it an essential item for companies and warehouses in the construction and industrial sectors. Their structure has been designed to allow lifting either by forklifts and pallet trucks, or by using a 4-arm chain. The presence of rails on the long side of the frames ensures stability during storage and handling operations, preventing unwanted shifts. These frames can be stacked on top of each other, optimizing the use of limited space in a warehouse. We offer a variety of models with different sizes to meet the specific needs of each situation.
