DATA SHEET - FORK MOUNTED FIXED CRANE JIB

Warehousing logistics

Fork mounted fixed crane jib

Fixed forklift crane jib attachment

The fixed crane jib is designed to quickly transform a forklift into a practical lifting solution for suspended loads. The structure ensures maximum robustness, stability, and ease of use in industrial handling, logistics, and construction operations.

Made of high-quality steel and equipped with a swivel hook, the jib allows safe handling of loads up to 3,000 kg while maintaining high performance even in intensive applications. The fork-mounted attachment system enables quick and secure installation without the need for structural modifications to the truck.

The configuration with a 1,850 mm spacing provides an ideal fixed outreach for precise and controlled lifting operations, reducing bulk and maintenance compared to telescopic versions.

Main features:

- Maximum capacity: 3,000 kg
- Fixed version
- Spacing: 1,850 mm
- Robust painted steel structure
- Swivel hook for easier and safer handling
- Quick attachment to forklift forks
- Ideal solution for industry, warehouses, and construction sites

All equipment is supplied complete with identification plate, CE marking, and user and maintenance manual.
