DATA SHEET - EXCAVATOR PIPE LAYING HOOK

Lifting clamps

Excavator pipe laying hook

Excavator pipe laying hook

This practical excavator attachment is specially designed for quick and safe lifting and handling of concrete pipes of varying lengths, allowing direct placement within excavations without the need for nearby workers. Available in the 4-ton version, the hook features a cylindrical design with a 'point' that enables lifting of pipes starting from 300 mm in diameter. Rubber buffers on the back plate act as shock absorbers, preventing pipe breakage during the insertion process. Adjustable pin intervals allow for fast mounting on a wide range of excavators equipped with quick couplers. The versatility of this attachment is further enhanced by the option to choose from 65 mm, 80 mm, or 110 mm pins, adapting to excavators with capacities ranging from 5 to 50 tonnes. This product is built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards and is issued with the appropriate metal ID plate, conformity certificate, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
