DATA SHEET - GALVANIZED GOODS LIFTING CAGE WITH RAMP

Storage and handling equipment

Galvanized goods lifting cage with ramp

Galvanized goods lifting cage for handling material

Introducing our goods lifting cage with ramp, a versatile accessory designed to facilitate safe lifting of materials and equipment on construction sites and in industrial environments. This basket is equipped with a sturdy ramp, providing easy access for loading and unloading pallets with a forklift or manual pallet jack. The robust structure and four lifting points on the sides ensure stability during handling and ensure a secure connection with the lifting device. Key features: Integrated Ramp: The ramp allows easy access to the basket, simplifying the loading and unloading process. Robust Structure: Built with high-quality materials, the basket is designed to ensure stability and durability over time. Secure Attachment Points: The four solid attachment points on the sides ensure a secure connection with the lifting device, reducing the risk of unwanted movements. Versatility: Ideal for safely and efficiently lifting materials and equipment in various work environments. Upon request, it is available in different sizes and capacities, as well as in a hot-dip galvanized version. This product is built and tested according to UNI EN ISO 12100, UNI EN 10027-1, and UNI EN 10204 standards and is issued with the appropriate metal ID plate, certificate of conformity. All our products are covered by a one-year warranty (European Directive).
