Storage and handling equipment

Galvanized tool box

Assortment of galvanized tool boxes

We introduce our galvanized toolboxes, a robust and durable solution for the safe transportation and storage of tools in various work environments.
These boxes are carefully designed to offer a combination of strength, corrosion protection, and ease of use.
Main Features:
Strength and Durability: The boxes are constructed with high-quality materials to ensure strength and durability, withstanding daily wear and the demands of construction site work.
Corrosion Protection: The galvanized finish provides effective protection against corrosion, preserving the structural integrity of the box even in more aggressive environments.
Side Handles and Lifting Brackets: Side handles allow for easy manual movement, lifting brackets at the base facilitate transport with forklifts, and side hooks enable lifting with four-leg chains and cranes.
Protection: The construction of the boxes ensures that tools inside are protected from adverse weather conditions.
Lockable: Option to secure with a padlock to ensure the safety of tools during transport and storage.
Upon request, we can customize the dimensions of the boxes to meet the specific needs of our customers, guaranteeing a tailored solution for every work situation.
This product is constructed and tested according to UNI EN ISO 12100, UNI EN 10027-1, and UNI EN 10204 standards and comes with the appropriate metal label and conformity certificate.
All our products are covered by a one-year warranty (European Directive).
