DATA SHEET - LIFTING CLAMP FOR PREFABRICATED ELEMENTS

Lifting clamps

Lifting clamp for prefabricated elements

Clamp for handling prefabricated elements

The PZM-J75 model is the ideal solution for easy and safe handling of eccentric weights. Suitable for a wide range of applications, including road kerbs, paving stones, channels, channels with kerbs, plant rings, driveways, and slabs of various sizes, this model allows for easy and secure gripping, ensuring a significant reduction in work times. The PZM-J75 clamps, lightweight yet extremely robust, ensure reliable performance in any working environment. Their speed of gripping and releasing the artifact, combined with precise adjustment, optimize operational efficiency and minimize delays on site. All our clamps are built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards, and are issued with the appropriate label, certificate of conformity, and user manual. All our products are covered by a one-year warranty (European Directive).
